2:23p 1 Exam 1 42.74  
2:23p 174 Spay Cat 1 124.12

Doctor's Instructions - Monica has undergone abdominal surgery in the form of an ovariectomy. Restricted activity for 14 days minimum is required for proper healing of the body wall, subcutaneous tissue and skin. She should be contained to leash walks only when outside to urinate and defecate. No running or jumping while off leash within the house.

Pain medications have been sent home and should be used as directed. If vomiting or upset stomach occurs on the medications it is advised to discontinue its use.

There are no skin sutures to take out as all sutures have been buried and will be absorbed by the body over time. If Monica were to lick or chew at her incision site she should be placed in an E-collar as licking and chewing can delay proper wound healing.
